**Pedal Open Diapason 16'**

This exceptional Pedal Open 16' rank (32 notes - full length) would be very suitable as an addition to any organ, small or large. The two windchests, the pipe supports and the appropriate windtrunks from the bellows to the windchests, as well as all electrical connections and wiring, are included.

It is in excellent condition and needs only to be wired into the organ and a wind feed added to the accompanying regulated reservoir. Very little restoration is required.

It functions at a wind pressure of 3 1/2" - 4" and mechanically dates from a 1957 Casavant Frères Ltd. rebuild of an earlier instrument.
